

1. TITLE OF THE CERTIFICATE (HU)

61 582 01 0100 52 01 Építési műszaki ellenőr II.

2. TRANSLATED TITLE OF THE CERTIFICATE (EN)

Technical buildings inspector II
(THIS TRANSLATION HAS NO LEGAL STATUS)

3. PROFILE OF SKILLS AND COMPETENCES

A typical holder of the certificate is able to:

- inspect the professional compliance of the construction industry building activity and the construction fitting work on the basis of an absolute and executable construction (establishment) licence, in the case of monuments on the basis of the monument protection authority licence and the associated approved construction-technical plan documentation and the implementation plan documentation;
- inspect the marking out of the construction and, if necessary, inspect that the soil mechanics, environmental protection and other surveys and tests have been carried out;
- inspect the construction journal, countersign the entries and other reports, and write opinions on the faults, deficiencies and deviations indicated in the construction journal;
- make proposals for the client in connection with changes to the plans justified due to technical or economic reasons;
- perform quality and quantity inspection of work before covered;
- participate in the technical handover and occupation procedure;
- inspect the technical performance indicators of the individual construction types, the observance of the safety prescriptions in connection with the technology, and the existence of the compliance certification of the materials and finished products installed and of the equipment;
- perform the documentation of the technical inspector tasks in the construction journal;
- prepare the decisions of the client in technical questions;
- make proposals in technical questions, e.g. the involvement of specialists;
- inspect financial accounting, surveys;
- draw up the performance certification in connection with the construction industry implementation activity;
- harmonise the activities of the technical chiefs responsible if the construction industry implementation activity is carried out by several contractors and ensure that the declarations made by the technical chiefs of the individual contractors with respect to the construction-fitting work performed are available to the client and the construction authority when the application for the licence for use is submitted;
- inform the client immediately on determining a fault or deficiency, about all circumstances that may influence performance according to the plan and the contract.
